About

Description

This started as just a Facebook page to share information on missing persons as there is not an official Illinois Database of Missing Persons.

But we wanted to do more – so we started working on the database.

We want to be a resource for families of those that are missing and also those who want to help.

At this time, we do not investigate cases.

Credits

I must thank the FB Page Idaho Missing Alert for the inspiration to get started all those years ago.

Secondly, I must thank Paul Lacey Digital for the website design.
